Mission:

The Division of Children's Special Health Services (CSHS) provides services for children with special health care needs and their families. CSHS promotes family-centered, community-based, coordinated services and systems of health care.

Programs within the division include:

Autism Spectrum Disorder (ASD) Database – CSHS administers an ASD database that includes records of all reported cases of ASD in North Dakota.

Care Coordination Program – CSHS supports community-based programs to help families who have children with special health care needs access services and resources. Partners include county social services and local public health. Staff also provide care coordination services for children and their families who contact the state office.

Children with Special Health Care Needs (CSHCN) Service System – CSHS supports initiatives that lead to a community-based system of services for all families, children, and youth with special health care needs. Activities focus on screening, transition, medical home, family partnership and satisfaction, adequate insurance, and community-based service systems.

Information Resource Center – CSHS provides health care resource information to families and service providers.

Metabolic Food – CSHS provides medical food and low-protein modified food products to individuals with phenylketonuria and maple syrup urine disease.

Multidisciplinary Clinics – CSHS funds and administers clinics that support coordinated management of 10 different types of chronic health conditions. Clinics provide access to pediatric specialty care and enable families to see many different medical providers and health care professionals in one place at one time.

Russell Silver Syndrome Program – CSHS pays for growth hormone treatment and medical food for individuals with Russell-Silver syndrome.

Specialty Care Diagnostic & Treatment Program – CSHS helps families pay for medical services for eligible children, including health care visits and tests to diagnose chronic health conditions early and specialty care needed for treatment.

State Systems Development Initiative (SSDI) – CSHS administers the State Systems Development Initiative (SSDI) grant. The purpose of SSDI is to develop, enhance, and expand State Title V Maternal and Child Health (MCH) data capacity. Improved data capacity supports effective, efficient and quality programming for women, infants, children and youth, including children and youth with special health care needs in North Dakota.

Facebook: <http://www.facebook.com/ndcshs>

Children's Special Health Services' sponsored or supported multidisciplinary clinics are intended to provide access to pediatric specialty care and enable families to see many different medical providers and health care professionals in one place at one time. Families that attend the clinics report that they are provided with:

- Information, education, and reassurance
- Diagnostic evaluation and/or treatment
- Coordinated, comprehensive care
- Follow-up and monitoring
- Access to specialty medical care

Please note that some of the clinics listed in this booklet are self-identified multidisciplinary clinics and may not be run in the same manner as those supported or sponsored by CSHS. The listing of pediatric specialists in this booklet is obtained from other specialty agencies, and does not guarantee acceptance of CSHS enrolled clients.

2016 CLINIC OVERVIEW

This publication contains many of the multi-disciplinary clinics for children that are offered across the state. The **bolded** clinics are sponsored by Children's Special Health Services and are offered at no cost to families. The other listed clinics are sponsored by private health care facilities.

Please check both the *Clinic Overview* and subsequent pages for details, as some clinics do not have specific dates established.

JANUARY – 2016

- 5 Fargo Down Syndrome Clinic
- 6 **Bismarck Asthma Clinic**
- 6 **Fargo Cerebral Palsy Clinic**
- 7 **Bismarck Asthma Clinic**
- 7 **Fargo Metabolic Disorders Clinic**
- 8 Fargo Feeding Therapy Clinic

DIAGNOSTIC SERVICES

ELIGIBILITY

- Child must be a North Dakota resident.
- Child must be birth to age 21.
- Child must have a special health care need. For diagnostic services, a child is medically eligible if he or she has or MAY POTENTIALLY HAVE a condition that is included on a list of more than 100 eligible conditions treated under the CSHS Specialty Care Program.
- Financial eligibility is NOT required for diagnostic services.

PARTIAL LIST OF CSHS-ELIGIBLE CONDITIONS

Acquired brain injury
Asthma
Bony deformities
Burns
Cancer
Cerebral palsy
Cleft lip and/or palate
Cystic fibrosis
Dental disorders
Diabetes
Genito-urinary tract anomalies
Growth hormone deficiency
Hearing loss
Heart conditions
Hemophilia
Joint deformity
Malocclusion
Muscular dystrophy
Phenylketonuria
Rheumatoid arthritis
Scoliosis
Seizure disorders
Spina bifida
Strabismus
Syndromes

IMPORTANT FACTS /TIPS

- Anyone may refer a child for diagnostic services.
- Except for emergencies, families apply at the county social service office in their county of residence.
- Diagnostic examinations provided by specialists promote early diagnosis of CSHS-eligible medical conditions.
- Diagnostic services can be helpful in two ways. First, they can be used to secure a diagnosis when the diagnosis of a potentially eligible condition is UNKNOWN. In this case, examinations can be covered until a decision about medical eligibility is reached. Secondly, diagnostic services can be used when the medical condition is KNOWN to find out whether or what kind of treatment is recommended.
- Effective date for services may be 90 days prior to application, when needed.
- To ensure high quality care, eligible children must receive services from a specialist who is approved to provide care under CSHS. A regularly updated list of North Dakota specialists who have met the standards established by CSHS is available.
- Payment for services is coordinated with other available sources of health-care coverage.

FOR FURTHER INFORMATION

Call or write Children's Special Health Services at the following:

Children's Special Health Services
North Dakota Department of Health

dohcshsadm@nd.gov
www.ndhealth.gov/cshs/

Revised 5/1/2015

(OVER)

TREATMENT SERVICES

ELIGIBILITY

- Child must be a North Dakota resident.
- Child must be birth to age 21.
- Child must have a special health-care need. For treatment services, a child is medically eligible if he or she has a condition that is included on a list of more than 100 eligible conditions treated under the CSHS Specialty Care Program.
- Family is financially eligible at 185 percent of the federal poverty level. See income guidelines chart below.

INCOME GUIDELINES EFFECTIVE 5/1/2015

Family Size	Gross/Adjusted Gross Income is no more than:
1	\$ 21,775
2	\$ 29,471
3	\$ 37,167
4	\$ 44,863
5	\$ 52,559
6	\$ 60,255
7	\$ 67,951

Gross income is generally used to determine financial eligibility. Adjusted gross income is used in instances of self-employment. Financial eligibility is determined annually.

If family income is above the federal poverty level, a child may still be eligible with a monthly cost/share. This means that the family must spend a designated amount for out-of-pocket medical expenses for the family unit before CSHS will pay for care or services for the eligible child.

IMPORTANT FACTS/TIPS

- Except for emergencies, families apply at the county social service office in their county of residence.
- If both financial and medical eligibility is present and treatment is planned, the application is approved for the specific medical condition. Effective date for services may be 90 days prior to application, when needed.
- To ensure high quality care, eligible children must receive services from a specialist who is approved to provide care under CSHS. A regularly updated list of North Dakota specialists who have met the standards established by CSHS is available.
- Payment for services is coordinated with other available sources of health-care coverage.
- Restrictions or coverage limitations may apply for certain services or eligible conditions.

PARTIAL LIST OF COVERED SERVICES

- Care coordination (by county social service staff)
- Dental services
- Formula (special)
- Genetic testing, evaluation and counseling
- Hearing aids
- Home health care in lieu of hospitalization
- Illnesses occurring during hospitalization
- Inpatient hospitalization
- Laboratory tests, X-rays and other diagnostic studies
- Medical equipment (limited to funding availability)
- Medications
- Nutrition services
- Occupational therapy
- Outpatient hospital services
- Physical therapy
- Physician’s, nurse practitioner’s and physician assistant’s services
- Prosthetic and orthotic appliances
- Respiratory therapy
- Speech therapy
- Supplies
- Vision services

PARTIAL LIST OF UNCOVERED SERVICES

- Ambulance charges
- Purchase of wheelchairs and hospital beds
- Hospice care
- Immunizations (routine childhood)
- Respite care
- Special shoes or shoe corrections, except when they are needed in relation to the fitting of a brace or other orthopedic appliance
- Well-child care
- Chiropractic care
- Transportation, meals and lodging (can be used to spend down monthly cost share when applicable)
- Care prior to the birth of an infant (e.g., fetal surgery)
- Routine infant formula (Similac, Enfamil, etc.)

|---|---|
| <p>ACQUIRED BRAIN INJURY
ADENOID HYPERTROPHY causing SLEEP APNEA
ALPHA 1-ANTITRYPSIN DEFICIENCY
AMPUTATION
AMYOTONIA CONGENITA requiring rehabilitative measures
ANAL STENOSIS & IMPERFORATE ANUS
ANEMIAS (excluding minor anemias), including sickle cell
APLASIA CUTIS CONGENITA, severe, requiring surgery & ECTODERMAL DYSPLASIA
ARNOLD-CHIARI DEFORMITY
ARTHROGRYPOSIS
ASTHMA, persistent, requiring controller medications
ATAXIAS, FAMILIAL DEGENERATIVE DISEASE requiring rehabilitative measures</p> <p>BILE DUCT ATRESIA
BIRTH INJURY (ERB's PALSY, etc.) requiring bracing or surgery
BONE CYST requiring surgery
BONE TUMORS, benign, requiring surgery, including OSTEOCHONDROMAS
BONY DEFORMITIES requiring bracing, casting or surgery & POST-TRAUMATIC DEFORMITY (orthopedic or severe soft tissue deformity due to injury; excluding acute fracture without an underlying condition)
BRAIN TUMORS requiring surgery and/or radiation
BRANCHIOGENIC CLEFT CYST requiring surgery
BREAST HYPOPLASIA causing considerable psychological problems requiring surgery
BURNS, severe, acute, including residuals</p> <p>CANCER, including CANCER OF EYE
CATARACTS
CELIAC DISEASE
CEREBRAL PALSY, congenital or acquired, requiring rehabilitative measures
CHOANAL ATRESIA
CHRONIC LUNG/LOWER AIRWAY CONDITIONS, including chronic lung disease, chemical pneumonitis, and subglottic stenosis
CLEFT LIP AND/OR PALATE, including SHORT PALATE and SUBMUCOUS CLEFT
CONGENITAL ADRENAL HYPERPLASIA (CAH)
COLLAGEN VASCULAR DISORDERS, including but not limited to lupus, dermatomyositis, scleroderma, Sjogren's syndrome, and rheumatoid arthritis
CORNEAL TRANSPLANTS
CRANIOSTENOSIS (premature synostosis)
CYSTIC FIBROSIS
CYSTIC HYGROMA
CYSTINOSIS</p> <p>DENTAL DISORDERS, congenital
DERMATOMYOSITIS
DIABETES INSIPIDUS
DIABETES MELLITUS, TYPE I and TYPE II
DIAPHRAGMATIC HERNIA
DISLOCATION OF HIPS OR OTHER JOINTS</p> | <p>EAR DEFORMITY
EHLERS-DANLOS DISEASE
ENCEPHALITIS, POLIOMYELITIS OR MENINGITIS, residuals of
ENUCLEATION (removal of eyeball)
EOSINOPHILIC GASTROENTERITIS
EPIDERMOLYSIS BULLOSA
ESOPHAGEAL VARICES
EYE WOUNDS, penetrating
EYELID DEFORMITY requiring surgery, congenital</p> <p>FACE DEFORMITY
FEMORAL CAPITAL EPIPHYSIS, slipped</p> <p>GASTROINTESTINAL TRACT ANOMALIES, congenital (including gastroschisis)
GENITO-URINARY TRACT ANOMALIES, congenital, severe and requiring surgery
GENU RECURVATUM, severe
GENU VALGUM (Knock-knees), severe
GENU VARUM (Bowed legs), severe
GLAUCOMA, congenital
GROWTH HORMONE DEFICIENCY
GUILLAIN-BARRE DISEASE, severe, acute, requiring tracheotomy and/or ventilation, including residuals</p> <p>HEARING LOSS
HEART CONDITIONS, congenital or acquired
HEMANGIOMA, medically significant
HEMOGLOBINOPATHIES, limited to:
Sickle cell anemia
Thalassemia
HEMOPHILIA including deformities
HISTIOCYTOSIS X (eosinophilic granuloma)
HYDROCEPHALUS requiring surgery
HYPERCHOLESTEROLEMIA, congenital, including familial combined hyperlipidemia
HYPERTHYROIDISM
HYPOPARATHYROIDISM, congenital or if suspected to last longer than two years
HYPOPHOSPHATEMIC RICKETS
HYPOTHALAMIC ADRENAL INSUFFICIENCY
HYPOTHYROIDISM</p> <p>ICHTHYOSIFORM ERYTHRODERMA, congenital, severe
IMMUNODEFICIENCY STATES including severe combined immunodeficiency (SCID)
INFLAMMATORY BOWEL DISEASE including Crohn's Disease and ulcerative colitis
INTERSEX DISORDERS, congenital</p> <p>JOINT DEFORMITY, CLUBFEET AND CLUBHANDS, severe, requiring bracing, casting, surgery or physical therapy
JUVENILE IDIOPATHIC ARTHRITIS, (Juvenile Rheumatoid Arthritis)</p> <p>KYPHOSIS, adolescent, requiring bracing or surgery</p> |
|---|---|

LARYNGEAL PAPILLOMA
LEUKEMIA
LEUKODYSTROPHY

MALOCCLUSION, handicapping

MASTOIDITIS, chronic

MEGACOLON requiring surgery

METABOLIC DISORDERS/INBORN ERRORS OF

METABOLISM

Amino Acid Disorders, limited to:

Arginase deficiency/Hyperargininaemia
Argininemia
Argininosuccinic acidemia (ASA lyase deficiency)
Carbamoyl phosphate synthetase deficiency
Citrullinemia (ASA synthetase deficiency)
Glutaric acidemia/aciduria
Glutathione synthetase deficiency (5-oxoprolinuria)
Homocystinuria (cystathione synthase deficiency)
Hypermethioninemia
Hyperornithinemia, hyperammonemia,
Homocitrullinemia (HHH syndrome)
Hyperornithinemia or ornithine oxo-acid
aminotransferase deficiency
Maple syrup urine disease (MSUD)
N-Acetylglutamate synthetase deficiency
Nonketotic hyperglycinemia
Ornithine aminotransferase deficiency
Ornithine transcarbamylase deficiency (OTC)
Phenylketonuria; (PKU)
Tyrosinemia (I, II, III);

Biotinidase Deficiency

Fatty Acid Oxidation Disorders, limited to:

2,4 dienoyl-CoA reductase deficiency
Long chain acyl-CoA dehydrogenase deficiency
(LCADD)
Long chain 3-OH acyl-CoA dehydrogenase deficiency
(LCHAD)
Carnitine/acylcarnitine translocase deficiency (CACT)
Carnitine palmitoyltransferase deficiency-type I
(CPTI)
Carnitine palmitoyltransferase deficiency-type II
(CPTII)
Carnitine transport defect (CTD)
Glutaric acidemia/aciduria
Medium chain acyl-CoA dehydrogenase deficiency
(MCAD)
Multiple acyl-CoA dehydrogenase deficiency
(MADD) or glutaric acidemia-type II (GAII)
Short chain acyl-CoA dehydrogenase deficiency
(SCAD) (ethylmalonic acidemia)
Trifunctional protein deficiency (TFP Deficiency)
Very long chain acyl-CoA dehydrogenase deficiency
(VLCAD)

Galactosemia

GLUT 1 Deficiency (glucose 1 transporter deficiency)

Glycogen Storage Disease

Hereditary Fructose Intolerance

Organic Acid Disorders, limited to:

2-methylbutyryl-CoA dehydrogenase deficiency
3-methylcrotonyl-CoA carboxylase deficiency
3-methylglutaconic-CoA hydratase deficiency
3-hydroxy-3-methylglutaryl-CoA lyase deficiency
Glutaric acidemia/aciduria
Isobutyryl-CoA dehydrogenase deficiency
Isovaleric acidemia (IVA)

Methylmalonic acidemia (MMA)

Propionic Acidemia

Mitochondrial acetoacetyl-CoA thiolase deficiency

(BKT, 3-ketothiolase deficiency)

Multiple CoA carboxylase deficiency

Refsum's Disease (Phytanic acid restriction)

MICROCEPHALY

MUCOPOLYSACCHARIDOSIS (MPS) (including variants)

NEPHROSIS & CHRONIC NEPHRITIS

NERVE INJURIES, chronic

NEUROFIBROMATOSIS

NEUROMUSCULAR DISORDERS limited to those covered

by MDA including muscular dystrophy

NEVI with malignant potential

OCULAR ALBINISM, congenital

OSTEOCHONDRITIS of various bones

OSTEOGENESIS IMPERFECTA

OSTEOMYELITIS, residuals of

PANTOTHENATE KINASE-ASSOCIATED

NEURODEGENERATION (PKAN)

(Hallervorden-Spatz Disease, including infusion pump)

PARAPLEGIA, traumatic, and its direct complications

PECTUS CARINATUM/PECTUS EXCAVATUM requiring
surgery

PERTHES DISEASE

POLYCYSTIC KIDNEY DISEASE

PRECOCIOUS PUBERTY

PSEUDOHYPOPARATHYROIDISM

PSORIASIS

PTOSIS (drooping eyelids)

PULMONARY LOBAR EMPHYSEMA

RETINAL DETACHMENT in Marfan's syndrome

RETROLENTAL FIBROPLASIA (retinopathy of
prematurity)

SCLERODERMA

SCOLIOSIS requiring bracing or surgery

SEIZURE DISORDERS, excluding febrile seizures

SHORT BOWEL SYNDROME

SPINA BIFIDA, MENINGOCELE, MYELOCELE

STRABISMUS through age 10

SUBLUXATED EYE LENS in Marfan's syndrome

SUPERNUMERARY PARTS, severe

SYNDACTYLY

SYNDROMES, limited, requiring ongoing medical treatment

THROMBOCYTOPENIA, congenital

THYROGLOSSAL DUCT CYST

T-LYMPHOCYTE IMMUNE DEFICIENCY STATE

TORTICOLLIS (not spasmodic, requiring casting or surgery)

TRACHEAL STENOSIS

TRACHEOESOPHAGEAL FISTULA

TRANSVERSE MYELITIS

TUBERCULOSIS OF BONES AND JOINTS

TUBEROUS SCLEROSIS

UNDESCENDED TESTES

WEGENER'S GRANULOMATOSIS

♥ The Long-Term Follow-up Clinic is part of Embrace, the Cancer Survivorship program at Sanford Roger Maris Cancer Center. At the clinic, our goal is to address the unique needs of survivors of childhood cancer and other childhood diseases treated with chemotherapy or radiation therapy. The clinic team is made up of several health care professionals that will monitor for and manage late effects of treatment in order to decrease long-term health risks. You will be provided health education regarding your diagnosis, treatment exposures, potential late effects, as well as future health recommendations and follow-up.

➔ Call to schedule appointment times and verify clinic dates.

- ♥ Cardiac Care for Children provides evaluation and diagnostic services for North Dakota children with cardiac conditions. The program covers examinations done in North Dakota by participating pediatric cardiologists and routine tests to support cardiac assessments. Care coordination services are provided through periodic recall and linkage or referral to other services and programs.
- ♥ It is preferred that children be screened by their primary care physician (PCP) before being referred. Medicaid and some insurance plans require a referral from the child's PCP.

SHRINERS OUTREACH CLINICS

Shriners Hospitals for Children® — Twin Cities Outreach Clinics

Shriners Hospitals for Children® - Twin Cities surgeons, nurses, and orthotics staff travel twice yearly to Bismarck to treat Shriners patients in a local setting and also to evaluate and potentially accept new patients. Transportation and lodging assistance also is available to families who travel to the hospital/clinic in Minneapolis. A physician referral is not required to obtain care at Shriners Hospitals for Children. We accept private insurance, North Dakota Medicaid, and the uninsured. All care at Shriners Hospitals for Children is provided regardless of the ability to pay or insurance coverage restrictions.

For over 90 years, Shriners Hospitals for Children have been specializing in pediatric orthopedics. We are part of an international network of 22 Shriners Hospitals for Children locations and for three years running, patients who have been surveyed for satisfaction through Press Ganey ranked our inpatient services in the top three percent nationally and our outpatient services in the top quartile nationally.

Orthopedic conditions treated include:

- Achondroplasia
- Amniotic band syndrome
- Arthrogyposis
- Blount's disease (tibia vara)
- Bone lesions
- Brachial plexus injury (Erb's Palsy)
- Bunions
- Cerebral palsy
- Charcot-Marie-Tooth
- Clubfoot/talipes equinovarus
- Dermatomyositis
- Developmental dysplasia of the hip
- Ehlers-Danlos syndrome
- Fracture
- Genu valgum (knock knees)
- Genu varum (bowed legs)
- In-toeing (pigeon toes and out-toeing)
- Juvenile idiopathic arthritis
- Kyphosis
- Legg-Calve-Perthes
- Limb deficiency
- Limb length discrepancy
- Lordosis
- Lupus
- Macroductyly
- Muscular dystrophy
- Osgood-Schlatter disease
- Osteogenesis imperfecta
- Patellar (knee) instability
- Pes cavus (high arched feet)
- Pes planus (flat feet)
- Polyductyly
- Rickets
- Scheuermann's disease
- Scleroderma
- Scoliosis
- Slipped capital femoral epiphysis
- Spina bifida (myelodysplasia)
- Spinal muscular atrophy
- Spondylosis
- Spondylolisthesis
- Sports injuries
- Syndactyly
- Tarsal coalition
- Tethered spinal cord
- Toe walking
- Trigger finger
- Vertical talus

Specialized plastic surgery services as well as other conditions not listed above will be considered on an individual, case-by-case basis with consideration given to the expert care provided by this and other Shriners Hospitals for Children. If, during the referral/inquiry process, our clinical team determines the patient's needs would be best met at another Shriners Hospitals for Children, the patient will be referred.
