Areal Extent:

Potential Environmental Impacts:

The soil on location had ice on top of the soil from snow melt which aided in keeping the produced water from penetrating the soil. The contaminated soil was removed and hauled of to Indian Hills Disposal.

Action Taken or Planned:

The produced water was suctioned up as soon as it was spilled by another Eiker truck waiting to unload. The vac truck returned to pickup any water remaining. The C&B Construction pushed up all bad soil and hauled it off to Indian Hills Disposal. New soil was put down on the turn around on location.

Wastes Disposal Location: Contaminated soil was haul to Indian Hills disposal on 12/1/2012.
