

Oil Field Environmental Incident Summary

Incident: 20130821211259 **Date/Time of Notice:** 08/21/2013 20:56

Responsible Party: Whiting Oil and Gas Corporation

Well Operator: WHITING OIL AND GAS CORPORATION

Well Name: LAROQUE 34-12H

Field Name: LONESOME

Well File #: 22274

Date Incident: 8/19/2013 **Time Incident:** 11:24

Facility ID Number:

County: MCKENZIE

Twp: 151

Rng: 102

Sec: 12

Qtr:

Location Description: 200 ft X 30 ft into uncultivated field - pasture

Submitted By: Adam Rookey

Received By:

Contact Person: Mitch Haugeberg
1700 BROADWAY STE 2300
DENVER, CO 80290

General Land Use: Pasture

Affected Medium: Topsoil

Distance Nearest Occupied Building: 0.78 Miles

Distance Nearest Water Well: 0.78 Miles

Type of Incident: Other - List Under Desc of Cause below

Release Contained in Dike: No

Reported to NRC: Unknown

	Spilled	Units	Recovered	Units	Followup	Units
Oil	0.25	barrels	0	barrels	0	barrels
Brine	0	barrels	0	barrels		
Other	0	barrels	0	barrels		

Description of Other Released Contaminant:

Inspected:

Written Report Received: 12/16/2013

Clean Up Concluded: 9/17/2013

Risk Evaluation:

to be determined

Areal Extent:

Potential Environmental Impacts:

to be determined

Action Taken or Planned:

well was shut in temporarily while maintenance was performed on dump valve, working properly now. oil mist impacted surface material will be collected from well pad and placed in pit lined & bermed area until ready for removal/disposal. Once contact is established with land owner and permission is gained and clean up discussed, impacted vegetation will be cut and bagged and top 1 inch of soil will be removed and replaced with fresh top soil. Samples will be taken for analytical of soil from before and after clean-up efforts to ensure adequate clean-up efforts.

Wastes Disposal Location: Approved facility- Indian Hills Disposal

Updates

Date: 8/22/2013 **Status:** Reviewed - Follow-up Required

Author: Roberts, Kris

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Release ,from a reported blowout, sprayed into pasture. Follow-up is needed. Inspection update to be emailed to Dr. Keller.

Date: 8/23/2013 **Status:** Inspection

Author: Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Temperature is 84 °F; wind from the southeast at 10-15 mph. Walked around the field but could not see where soil was impacted. It appears the field has been sprayed by farm chemicals. No area had been scraped up to this point. Would followup later to see if anything was done in the field.

Date: 10/22/2014 **Status:** Inspection

Author: Cooper, Mike

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on site at 11:05 CT. Temperature 56 degrees and wind 5-10 mph NE. Walked around site and did not notice any oil-impacted soil around the outside of the site. No sign of spill on the east, north or west side of site. I did notice some bare spots within the field itself, but those could also be due to erosion over time. More followup is required to check for regrowth of vegetation next summer.

Date: 6/10/2015 **Status:** Inspection

Author: Washek, Sandi

Updated Oil Volume: 0.25 barrels

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on site at 1:34 p.m. Weather was overcast with wind out of the east 10 mph. Conducted followup to examine if the plants were stressed (as reported in observations last year of a bare spot in the field surrounding the oil pad). Did not observe any plant stress on the day of the inspection. Wheat crop looked very nice. No additional followup needed.
