Date: 1/29/2014 **Status:** Inspection

Author: Espe, Brady

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

When I arrived at the site the temperature was 22 °F, with a wind from the west at 20 mph. The well pad has a gravel dike around the outside edge, along with a dike system around the tank battery. The owners have placed a dumpster for collection of filter socks. I did not see anything on the site; the spill was cleaned up. Did not appear anything left the site; I do not see any other issues at this time. No follow-up inspection is required at this time.
