

Oil Field Environmental Incident Summary

Incident: 20140113112757 **Date/Time of Notice:** 01/13/2014 11:18

Responsible Party: Precision Drilling/Wyoming Casing Svc.

Well Operator: HESS CORPORATION

Well Name: EN-STATE C- 156-93-1615H-5

Field Name: ALGER

Well File #: 26719

Date Incident: 1/12/2014 **Time Incident:** 05:30

Facility ID Number:

County: MOUNTRAIL

Twp: 156 **Rng:** 93 **Sec:** 16 **Qtr:**

Location Description: On January 12, 2014 on EN-STATE C- H5, while running 4 ½” frac string, Precision and Wyoming Casing Services observed oil leaking from somewhere from the drill floor on the Driller side where Wyoming had hung their hydraulic lines up over the handrails. At the time it was undetermined where the leak was coming from. About 1 ½ to 2 gallons were spilled to the ground. Precision Rig Manager tightened up a JIC valve and Wyoming swapped out their hydraulic lines. Precision and Wyoming both agreed to keep a watchful eye out for any further leaks. After the hydraulic lines were changed out and tightening of the valve no further leaks have accrued. Clean up began using absorbent pads, shovels and placed in spill containment drum. The Hess DSV and the Hess EHS Rig Specialist were notified.
