Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

According to incident summary, this spill was reported verbally to NDIC; however, a followup is necessary due to ensure proper reporting.

Date: 2/14/2014 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 14:15 2/14/14.

Oil flowed from treater to the south in an area that is considered off of the oil lease. Cleanup considered insufficient by company; there is oil-stained soil below the snow layer.

Follow up in the spring with on-site inspection to ensure proper cleanup. Follow up on 2/18/14 with company reporting the findings of the inspection.

Date: 4/22/2014 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 13:15 4/22/14.

Very little cleanup has occurred. There is currently a stain of crude oil roughly 20 feet in diameter at the impact location. The company contact has been called and has been asked to remediate the site with confirmation of site remediation by PID tests. The company has been given to the middle of May to fully remediate the site.

More followup is necessary during the week of May 12.

Date: 5/5/2014 **Status:** Correspondence

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Received a phone call from company contact 9:40 5/5/13.

Cleanup has been halted due to unforeseen circumstances. However, the plan is to remove the contaminated soil and bring in new soil.

More followup is necessary to ensure cleanup.

Date: 6/9/2014 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 6/9/2014.

Grass is growing in the impacted spot, and there is no sign of crude oil impact in the impacted area. Remediation is considered complete pending results of the samples.

More followup is necessary pending sample results.

Date: 8/25/2014 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location 8/25/2014.

Spill has been cleaned up, and the area has been reseeded. New vegetation is doing nicely in the area.

No more followup is necessary.
