Notes:

4/3/2014 at 11:37, on location. Met with site supervisor. Release came out of wellhead and impacted field stubble to northwest. Field has been scraped up and vegetation in field removed. No visible stain on field stubble outside of the scraped area. One pile of impacted dirt/vegetation left on site which will be removed today; two truckloads have already been removed. Some vegetation (but not field stubble) directly adjacent to well pad equipment still impacted; this was communicated to site supervisor.
