**Notes:**

On site 13:20, off site 13:45. Partly cloudy, wind south at 15 mph, 67 degrees. No waters in the immediate drainage area. Well site cleaned up. Based on the mowed/clipped area, the wind at the time of the incident was out of the west and quite strong. Topography rises to the east and appears to have effectively captured the spray between the well facility and the road ditch 20 meters east. Grass has been clipped/mowed in a rectangular area approximately 100 by 30 meters. Clippings have been removed. Grass has greened up in the clipped area, and the grasses in the surrounding appear healthy. No evidence of oil on ground.
