Description of Other Released Contaminant:

An estimated 1 cubic foot of dry gas was released onto the surface soil adjacent to surface piping.

Inspected:

Written Report Received:

Clean Up Concluded:

Risk Evaluation:

There were no immediate risks to human health or the environment.

Areal Extent:

Release, contained at surface soil, is approximately six square feet.

Potential Environmental Impacts:

A 10' X 20" area of suppressed vegetation and a 3' X 2' area of discolored soil. There were no impacts to surface water or groundwater.

Action Taken or Planned:

The active line in the area was immediately isolated. U.S. Forest Service personnel were notified immediately. One-Call is underway and repairs will be made shortly thereafter (estimated repair on 9/30).

Wastes Disposal Location: Recovered wastes will be disposed in accordance with applicable State/Federal regulations.
