Release, due to an on-location valve/piping leak had an off-site impact. Followup is necessary.

Date: 10/15/2014 **Status:** Inspection

Author: Martin, Russell

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

10/15/2014 at 17:05, on location. No visible staining outside of secondary containment of tank battery at the southern side of the wellpad. Some holes appear to have been dug at the southeastern corner of the wellpad near the tank battery containment, but no staining is visible in the holes. To the north of the wellpad entrance (also located near the southeastern corner), a strip of ground has been scraped up along the eastern fenceline for ~160 ft. No staining is visible within scraped ground or on ground and vegetation outside of scraped area.
