**Notes:**

I arrived at the site at 9:10 a.m. The weather was 38°F and overcast, with the wind 10 mph from the northwest. The site was being reclaimed on the outside of pad. I called the company representative who reported the spill. He indicated that the spray went north to northwest of the well. A small amount made it to the edge of the pasture on the north side of pad. Company personnel met with the landowner to discuss what he wanted to do. The landowner requested to leave the vegetation alone. I walked around the pasture on the north side and could not see any sprayed vegetation at this time. No further followup needed at this time. 47 25.032; -102 34.693
