Description of Other Released Contaminant:

Inspected:

Written Report Received: 3/7/2016

Clean Up Concluded: 1/13/2015

Risk Evaluation:

No immediate risk to environment or health.

Areal Extent:

Potential Environmental Impacts:

Soil contamination

Action Taken or Planned:

Surface landman has on-site evaluation with surface owner tomorrow morning to determine how he would like off-site spill cleaned/remediated. All contaminated soil on the facility location will be cleaned and hauled to disposal. TUSA will be checking into reprogramming the ESD valve, the stuffing box will be repacked before firing up the well, and the lease operators will be reminded to take extra care of the stuffing boxes-especially in colder weather.

Updated Other Contaminant

Notes:

7/27/2016 at 17:33, on location. No visible staining off north side of wellpad. There are some vegetation issues (scattered growth) directly adjacent to the wellpad, but issue appears to be due to erosion or weed maintenance from the wellpad. No further follow-up required at this time.
