Notes:

Arrived on location 13:26 4/8/2015.

Small wetland between flare pit and pump jack that has oil sheen, dead vegetation, and elevated chloride readings(620 ppm on low-range quantlab test strip, 596 on high-range quantlab test strip). Sample collected at the wetland for Group 190 and DRO (15-C267 to 15-C271). It has yet to be determined if the wetland is considered on the lease location or off the lease location. A message was left with the company contact.

More followup is necessary.
