Notes:

On site 3/25/15, at 10:45 a.m. Spoke to personnel on site. Release came from a large storage tank on site. Release flowed off location to the north of pad and spread to the east. With recent snowfall, I was unable to determine potential impact to soil and vegetation. More followup is required.

Notes:

I arrived at the site at 3:05 p.m. The weather was cloudy, 32°F, with wind from the west 0-5 mph. The outside area of the pad has been recently reclaimed and seeded. I could not see any impacts on the pasture to the north and east. There also were recently installed pipelines in the same pasture, and the pipeline right of way was recently seeded. In addition, the pasture was grazed recently. No further followup is needed at this time. 47.47465,-102.75398
