

Oil Field Environmental Incident Summary

Incident: 20150404102037 **Date/Time of Notice:** 04/04/2015 10:20

Responsible Party: HESS BAKKEN INVESTMENTS II, LLC

Well Operator: HESS BAKKEN INVESTMENTS II, LLC

Well Name: OLSON 20-1H

Field Name: JIM CREEK

Well File #: 17395

Date Incident: 4/3/2015 **Time Incident:** 08:30

Facility ID Number:

County: DUNN

Twp: 145

Rng: 96

Sec: 20

Qtr:

Location Description:

Submitted By: Jason Henry

Received By:

Contact Person: Jason Henry
3015 16th Street SW, Suite 20
Minot, ND 58701

General Land Use: Well/Facility Site

Affected Medium: Topsoil

Distance Nearest Occupied Building: 0.5 Mile

Distance Nearest Water Well: 0.5 Mile

Type of Incident: Valve/Piping Connection Leak

Release Contained in Dike: No

Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil	100	Barrels	98	Barrels		

Brine

Other

Description of Other Released Contaminant:

Inspected:

Written Report Received: 9/1/2015

Clean Up Concluded: 5/15/2015

Risk Evaluation:

The source of the release was secured immediately upon discovery of the incident.

Areal Extent:

Approximately 5,000 square feet of impacted vegetation and topsoil off location to the east.

Potential Environmental Impacts:

The release occurred above ground, and a transport truck was dispatched to the location to begin recovering as much of the released crude oil as practicable. Approximately 98 bbls of crude oil was recovered as of 17:00 on 4/3/2015.

Action Taken or Planned:

A transport truck was dispatched to the location to begin recovering as much of the released crude oil as practicable. Approximately 98 bbls of crude oil was recovered as of 17:00 on 4/3/2015. The impacted soil (on location and off location to the east) will be excavated and transported to a properly permitted disposal facility.

Wastes Disposal Location: At a properly permitted disposal facility.

Notes:

I arrived at the site at 10:33 a.m. The weather was clear, 43 °F, with the wind from the southeast 5-10 mph. I could see the area in the containment around the tanks was still stained. Going east off site the grass was mowed, and the cut vegetation was gone. The stubble field to the east has been seeded. I walked around and could not see any crude oil staining. I will request more information on the site. More followup needed. 47.31696; - 103.63740

Date: 8/31/2016 **Status:** Inspection

Updated Other Volume:

Updated Other Contaminant

Notes:

On location 8/31/2016, at 10:47 a.m. Vegetation to the east of location has been harvested. The remaining stubble in area appears consistent with the rest of the field. No further follow-up required.

Notes:

Received an email with a report documenting the incident, cleanup and analytical results from the 2015 release. The report showed that impacted soils were removed and transported to a disposal facility. Groundwater was not encountered, and confirmation samples showed "no detect" from excavated areas. Report added to the incident folder. Visual observations of the site conducted by NDDoH inspector two weeks ago showed vegetation to be healthy and consistent for the area. No further follow-up needed.
