Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

I arrived at the site 11:52 a.m. The weather was sunny, 79°F, with the wind from the northwest 5-10 mph. The spray came from the flare area and went north onto a wheat crop. You can see the stained wheat in the field and vegetation on the edge of the dike. The cleanup has not occurred. More follow-up needed to verify the cleanup.
