Updated Other Contaminant

Notes:

10/9/2015 at 13:02, on location. Flare located in SE corner of facility. Scoria around flare on location shows visible staining. To south of flare off location, vegetation has no visible stress or staining; however, cattle gates in this area do show some staining. To the east of the flare off location, vegetation has been mowed down, and fenceline is heavily stained. Mist appears to have gone in this direction. No visible staining to the ground or to vegetation outside of the mowed area. No further follow-up required.
