Notes:

Arrived on site at 3:03 p.m. CT. Overcast and raining, temps at 43 F with wind out of the NE at 15 mph. The location of the spill is on the west side of 7th Street NW; GPS N47.54915, W102.96229.

The area of impact is about 3 feet wide by 4 feet long. There is fresh soil in the ditch where the soil appears to be removed and replaced. The rest of the ditch appears to have good vegetative cover. No water was impacted. Followup in the spring will be needed to ensure vegetative growth occurs.
