**Notes:**

I arrived at the site at 2:56 p.m. The weather was partly cloudy and 23°F, with wind from the southeast 5-10 mph. The area straight north of the flare has very little snow compared to the rest of the area, and it appears to have been scraped. I could not see any oil staining. More follow-up is needed next growing season. 47.64651, -103.11211
