Date: 1/20/2016 **Status:** Inspection

Author: Cooper, Mike

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 2:15 p.m. 14 degrees F, wind 5-10 mph NE. Site has no berm or dike containing material that could leave site. Very small site with about 5 inches of snow cover. Oil blotches were noticed off site, and I did not see any evidence of cleanup. I did notice that the "treater" blows directly into the field as it is turned horizontally (see pictures). Further follow-up is necessary in the spring to check on cleanup, disposal and vegetative growth in the area.
