**Notes:**

I arrived at the site 1:58 p.m. The weather was sunny and 32°F, with wind from the southwest 5-10 mph. The area had recent snow; I could not see any area sprayed on the north side off pad. The land around the pad is pasture. The vegetation was covered by snow. More follow-up needed to check on vegetation. 47.81805, -103.01098

**Notes:**

6/15/2016 at 14:07, on location. Hill slope directly north of wellpad is well vegetated; no bare patches noted. No staining visible. One bare spot off to the west of the wellpad, but this appears to be unrelated as there are some pipes and plywood in it. No further follow-up required at this time.
