Updates

Date: 9/27/2016 **Status:** Inspection

Author: O'Gorman, Brian

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 13:50. 72 degrees F, sunny, south wind 0-5 mph. Walked the area north of the flare and took photos. Did not notice any oil-stained soils or vegetation, only burnt or non-existent vegetation from the fire. More follow-up to determine revegetation of the area.

Date: 12/21/2016 **Status:** Inspection

Author: Torgerson, Brad

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Visited site on September 8, 2016 at 6:00 pm. Light Rain and 56 Degrees F - It appeared the flare located at SW corner of well facility may have ignited grass/stubble net to flare and stubble was burned for approximately 125 yards WSW of the well facility. No further follow-up appears to be necessary.
