Notes:

I arrived at the rest area around 12:14 p.m. When I arrived at the site, the weather was 51 °F with wind from the northeast at 10-15 mph. There was a small amount of staining on top of the metal containment dike in the southeast corner. The majority stayed in containment. More cleanup will be done in the near future when the area dries up. Did not impact any surface water, so no further followup needed at this time. 47.802517; - 103.646267
