Notes:

Three-barrel crude oil release from a loose pipe fitting on a tank that is contained, according to the report. Phoned the Conoco Phillips contact on 6/6/14, at 16:20 and ascertained that the release had been contained, vac'd up with a vac truck, and they were in the process of getting equipment to remove soil. Was also informed that the release stayed on the well pad location. NDIC retains oversight. Spill report also forwarded to Cody Vanderbusch, NDIC.
