Notes:

Arrived on location at 10:15. 52 degrees F, sunny, southwest wind 10-20 mph. Parked on an approach approximately 100' south of GPS coordinates. Walked north approximately 300' on east side of ditch and back south to vehicle on west side of road ditch. It appeared this area had been recently disturbed, seeded and had wattles in place for erosion. Vegetation appeared healthy, and no bare soil areas with staining were noted. No further followup needed at this time.
