**Notes:**

2/24/2016 at 15:58, on location. Met with site personnel. Transfer hose located in northwest corner of facility property; personnel still unsure how cut occurred. According to personnel, diesel spill went north along fenceline into adjoining field to the east. Both areas have been scraped up, and no visible staining remains. Left message with report contact about soil sampling in field to verify cleanup. More follow-up required.
