Contact Person: Kim Rudningen
2700 Lincoln Ave SE
Sidney, MT 59270

Distance Nearest Occupied Building: 0.25 Miles **Release Contained:** Yes

Type of Incident: Leaking flange

Description of Released Contaminant: Therminol 55

Volume Spilled: 0.50 gallons **Ag Related:** No

EPA Extremely Hazardous Substance: No **Reported to NRC:** No

Cause of Incident:

A flange was found to be leaking in the hot oil system causing a small amount of oil to be released. A majority of the release was captured in containment, with some reaching gravel due to wind and splash.

Risk Evaluation:

There are no immediate risks associated with this release.

of Fatalities: **# of Injuries:** **Affected Medium:** 03 - soil

Potential Environmental Impacts:

The area was immediately cleaned up and there is no impact to ground water or surface water.

Action Taken or Planned:

The leaking flange was repaired. The small amount of impacted gravel was removed to a closed container for disposal in the future.

Wastes Disposal Location: Certified Landfill

Agencies Involved:

Updates

Date: 5/17/2016 **Status:** Reviewed - Follow-up Required

Author: Espe, Brady

Updated Volume:

Notes:

According to the report, the release remained within property boundaries. However, the report does not state it is an NDIC-permitted well site. More follow-up needed.
