

Questions from Webex

1. What amount of blood spill requires Hepquat prior to Sanicloth wipe. Our facility currently wipes up small spills with sani wipes and rarely uses Hepquat except for large blood spills.

Any spill, any size you need to use Hepquat, 1:10 Bleach or appropriate Disinfectant.

2. If new employee comes with record of receiving the Hep B series, does testing need to be completed

No testing needs to be offered or completed if the employee has a record of receiving the vaccine.
