

Technical Assistance

Here are my next steps for supporting your efforts.

1. I will put together an assessment of what other states have done (best practices and strategies) around integrating their strategic plans among subgroups or subcommittees of their ECCS programs. In this assessment, I will specifically look for other states that have similar goals and focus areas to North Dakota to assist in HNDECA's strategic planning efforts.
2. I will explore what other states that are actively working with their Governor's Early Learning Councils and request a copy of their grant application or other documents that might be of assistance in North Dakota's efforts to move forward a partnership with the ELC.
