- **Community Readiness**

- http://www.ndhealth.gov/injury/nd_Prevention_Tool_Kit/CommunityReadiness.html

- Reviewed importance of community readiness
- Mallory and Kristina shared a draft of a Gameboard and accompanying templates for Community Readiness Planning. The Gameboard would include activities for each community readiness level and what to focus on in that level. The template would include who to talk to, sample messaging and “asks” for community members.
- The group was asked for feedback and it was decided to continue developing these tools, but to customize the “asks” more.
- Please refer to your community’s fact sheet when planning activities and reporting on them at future Primary Prevention Partner Meetings.

- **NSVRC Training**

- CAWS and the NDDoH are planning to have NSVRC do a training/workshop March 27 or 28 in Bismarck on working with the media on sexual violence prevention. It was inspired by this recent resource from NSVRC <https://www.nsvrc.org/moving-toward-prevention-guide-reframing-sexual-violence>.
- The idea is to have participants walk away with useable messaging for SAAM. The workshop will be open to anyone interesting in working with the media or violence prevention messaging. Kristina will share the gameboard and templates with NSVRC to get input. The group wants to learn about how to counteract victim blaming and reframe messaging.

- **Community Readiness Program Updates**

- **The group used a table and their readiness level scores to frame program updates.**
- Mary Thysell (Level 3) – Was doing Safe Dates in school before so working to get that going again. Talking about social norms. Suggested using YRBS when talking about local problem.
