2018 Buckle Up!
Grades 3-6
Every time you get into the car ask yourself...

Are you Ready?
Are you Safe?
Then Go!

Are you sitting in the back seat in the car?
Are you buckled?

Go only if you can say YES to these questions. If you can’t, then make yourself safe!
Safety Anatomy Labels

Cut and paste these labels to the correct area above:

- **Booster**
  - Makes seat belt fit correctly

- **Lap Belt**
  - Goes over your hips/thighs

- **Shoulder Belt**
  - Center it on your shoulder

- **Hips**
  - Strong bones

- **Chest**
  - Strong bones

- **Head Restraint**
  - Protects your head

- **Happy**
  - Feel good with the right fit!

- **Thumbs Up**
  - Ready, Safe, Go!
1. Color the seat belts red.
2. Color the boosters orange.
3. Color the hands yellow.

Children younger than 13 should always ride in the back seat where it is safer for them.
Untangle the Seat Belts

The seat belts are tangled.
Which seat belt leads to the buckle?

Short or long, buckle up every time!
2017 ND Child Passenger Safety Law:

- Younger than 8 ride in a car seat or booster
- 8 thru 17 ride in a booster or seat belt
Are you ready for the seat belt?

To find out if you are ready to ride in a seat belt, try the five-step questions below.

When you put the seat belt on in the back seat:

- Can you sit with a straight back against the vehicle seat back? Yes No
- In the same position, do your legs bend comfortably at the edge of the vehicle seat? Yes No
- Does the lap belt stay low, touching your thighs (not the belly)? Yes No
- Does the shoulder belt lay centered between your neck and your arm, on your shoulder? Yes No
- Can you sit this way without slouching during the whole ride? Yes No

If you answered no to any of these questions, you would be safer riding in a booster seat with a lap and shoulder belt.

All vehicles are not the same, test yourself in every vehicle.
BEST PRACTICES FOR BUCKLING UP CHILDREN

To help you provide the safest way to travel with your child, the North Dakota Department of Health offers the following best practice recommendations:

Children younger than 13 should ride in the back seat.

REAR-FACING
Children should ride rear-facing until at least 2 years of age. Two types of car seats are available for rear-facing:

**Infant Seats** – Most of these seats can be used until 22-35 pounds. Use them until the highest weight limit or until the child’s head is within one inch of the top of the seat.

**Convertible Seats** – These seats can be used rear-facing and forward-facing. Most can be used rear-facing up to 30-40 pounds. Use them rear-facing until the highest weight or height limit allowed by the manufacturer.

FORWARD-FACING
When children are at least 2 years of age or have outgrown the highest rear-facing limits of their car seat, they may ride forward-facing in a car seat with a harness. Use the seat until the child reaches the harness’s highest weight limit allowed by the manufacturer. Car seats with harnesses can be used up to 40-100 pounds.

BOOSTERS
When children have outgrown the harness in their forward-facing car seat, they may be moved to a booster. The child should be at least 40 pounds and at least 4 years of age. Keep the child in the booster until about 4’9” tall or the seat belt fits correctly over the child’s body. Most boosters can be used up to 80-120 pounds.

SEAT BELT
Children should use a seat belt when it fits over the body correctly. For a seat belt to fit properly, the lap belt must lie snugly across the upper thighs and be snug across the shoulder and chest. It should not lie on the stomach or across the neck.

FOR YOUR CHILD’S SAFETY:

**Select** a car seat based on your child’s age, size, development and maturity. Weight and height information will be on labels attached to the car seat and in the instruction manual.

**Register** your car seat, check for recalls and monitor the expiration date of the seat.

**Secure** your child in the seat snugly, following the car seat instructions.

**Install** the seat tightly in your vehicle using the seat belt or lower anchors and tether (LATCH) system. Follow the car seat instructions and vehicle owner’s manual.

Need help with your car seat? Visit a car seat checkup or child passenger safety technician for assistance. Call the North Dakota Department of Health at 800.472.2286 (press 1) or go to www.ndhealth.gov/injury/ for a list of car seat checkups.
