

# TOBACCO *Facts*

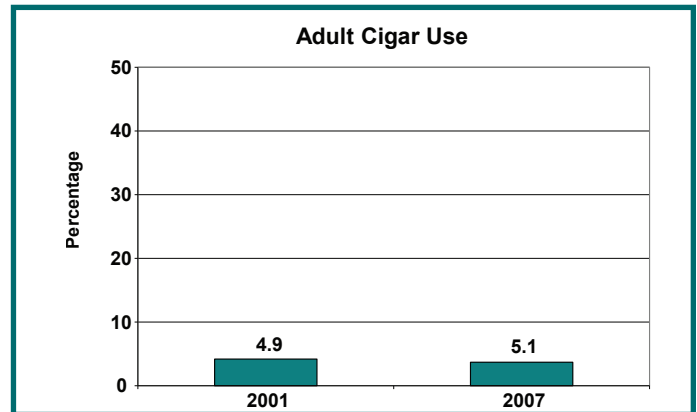

## Trends in Adult Tobacco Use

The percentage of North Dakota adults who currently smoke declined between 2001 and 2004, and has remained relatively stable through 2010.

Despite a decline in 1998, the percentage of North Dakota adults who use smokeless tobacco products has remained relatively stable. North Dakota's goal was to obtain a 3.5 percent smokeless tobacco use rate by 2010.

The rate of cigar smoking by North Dakota adults has remained stable between 2001 and 2007.

**Source:** The Behavior Risk Factor Surveillance System (BRFSS) is an ongoing state-based telephone surveillance system supported by the Centers for Disease Control and Prevention (CDC). Through a series of monthly telephone interviews, states uniformly collect data on the behaviors and conditions that place people at risk for chronic diseases, injuries and preventable infectious diseases.
