#### **Data Sources**

The Demographic Section of this report comes from the US Census Bureau (census.gov). Most tables are derived either from the census estimates for 2017 or from the Community Population Survey aggregated over a several year period. The table header describes the specific years from which the data is derived. The tables present the number of persons and percentages which in almost all circumstances represent the category specific percentage of all persons referenced by the table (e.g., percentage of persons age 15 and older who are married). Age specific poverty rates represent the percentage of each age group in poverty (e.g., percentage of children under five years in poverty).

The **Vital Statistics** section of this report comes from the birth and death records collected by the North Dakota Department of Health Vital Records. This data is aggregated over a five year period. All births and deaths represent the county of residence not the county of occurrence. In order to maintain a person's confidentially, the number of events is blocked if fewer than six.

The **Adult Behavioral Risk Factor** section of this report is derived from the North Dakota Department of Health's Behavioral Risk Factor Surveillance Survey. The aggregated data (the number of years specified in the table) is continuously collected by telephone survey from persons 18 years and older residing in North Dakota. All data is self-reported data.

Data presented in the **Crime** section of this report is collected from the North Dakota Attorney General website located at: <u>attorneygeneral.nd.gov/public-safety/</u> <u>crime-data</u>.

Data presented in the **Child Health Indicators** section of this report is collected from the Kids Count Data Center website located at: <u>datacenter.kidscount.org</u>.

## **Vital Statistics Data**

#### **BIRTHS AND DEATHS DEFINITIONS**

**Birth Rate** = Resident live births divided by the total resident population x 1000.

**Pregnancies** = Live births + Fetal deaths + Induced termination of pregnancy.

**Pregnancy Rate** = Total pregnancies divided by the total resident population x 1000.

**Fertility Rate** = Resident live births divided by female population (age 15-44) x 1000.

**Teenage Birth Rate** = Teenage births (age <20) divided by female teen population x 1000.

**Teenage Pregnancy Rate** = Teenage pregnancies (age<20) divided by female teen population x 1000.

**Out of Wedlock (OOW) Live Birth Ratio** = Resident OOW live births divided by total resident live births x 1000.

**Out of Wedlock Pregnancy Ratio** = Resident OOW pregnancies divided by total pregnancies x 1000.

**Low Weight Ratio** = Low weight births (birth weight < 2500 grams) divided by total resident live births x 1000.

**Infant Death Ratio** = Number of infant deaths divided by the total resident live births x 1000.

**Childhood & Adolescent Deaths** = Deaths to individuals 1 - 19 years of age.

**Childhood and Adolescent Death Rate** = Number of resident deaths (age 1 - 19) divided by population (age 1 - 19) x 100,000.

**Crude Death Rate** = Death events divided by population x 100,000.

**Age-Adjusted Death Rate** = Death events with age specific adjustments x 100,000 population.

#### **ADULT BEHAVIORAL RISK FACTORS DEFINITION**

The following three pages represent data received from the Adult Behavioral Risk Factor Surveillance Survey. Numbers given are point estimate percentages followed by 95% confidence intervals. Statistical significance can be determined by comparing confidence intervals between two geographic areas.

To be statistically significant, confidence may not overlap. For example the confidence intervals 9.3 (8.3-10.2) and 10.8 (10.0-11.6) overlap so the difference between the two numbers is not statistically significant. That means that substantial uncertainty remains whether the apparent difference is due to chance alone (due to sampling variation) rather than representing a true difference in the prevalence of the condition in the two populations. The less they overlap, the more likely it is that the point estimates represent truly different prevalence's in the two populations.

## ADULT BEHAVIORAL RISK FACTORS, 2013-2017

	ALCOHOL	Dickey 2013-2017	North Dako 2013-2017
Binge Drinking	Respondents who reported binge drinking (5 drinks for men, 4 drinks for women) one or more times in the past 30 days.	18.2 (11.9-24.5)	24.0 (23.3-24.7)
Heavy Drinking	6.2 (1.9-10.4)	7.1 (6.6-7.5)	
Drunk Driving	<b>Drunk Driving</b> Respondents who reported driving when they had too much to drink one or more times during the past 30 days.		3.7 (3.2-4.3)
	ARTHRITIS		
Doctor Diagnosed Arthritis	Respondents who reported ever have been told by a doctor or other health professional that they had some form or arthritis.	26.2 (20.2-32.3)	24.3 (23.7-24.9)
Activity Limitation Due to Arthritis	Respondents who reported being limited in any usual activities because of arthritis or joint symptoms.	32.7 (17.4-48.0)	46.7 (45.0-48.5
	ASTHMA		
Ever Asthma	Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma.	14.5 (8.6-20.5)	12.6 (12.1-13.1
Current Asthma	Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma and who still have asthma.	8.6 (4.1-13.2)	8.7 (8.3-9.2)
	BODY WEIGHT		
Overweight, Not Obese	Respondents with a body mass index greater than or equal to 25 but less than 30 (overweight).	32.2 (25.5-38.9)	36.3 (35.5-37.1
Obese	Respondents with a body mass index greater than or equal to 30 (obese).	35.6 (27.9-43.4)	31.9 (31.1-32.6
Overweight or Obese	Respondents with a body mass index greater than or equal to 25 (overweight or obese).	67.9 (60.2-75.5)	68.2 (67.4-68.9
	CANCER		
Any Cancer	Respondents who reported ever having been told by a doctor, nurse or other health professional that they had cancer (excluding skin cancer).	9.6 (6.0-13.2)	10.0 (9.7-10.4)
	CARDIOVASCULAR		
Heart Attack	Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a heart attack.	4.3 (1.7-6.9)	4.2 (4.0-4.5)
Angina	Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had angina.	4.4 (1.3-7.5)	3.9 (3.7-4.2)
Stroke	Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke.	1.9 (0.6-3.3)	2.6 (2.4-2.8)
Cardiovascular Disease	Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had any of the following: heart attack, angina or stroke.	7.9 (4.3-11.5)	7.7 (7.4-8.1)

#### CRIME

Data presented on the North Dakota Attorney General website changed from previous years. In an effort to continue to provide this data, the 2016 variables are defined as follows which differs slightly from the 2010-2013 data:

- <u>Rape</u>: includes statutory rape and forcible rape
- <u>Assault</u>: only includes aggravated assault
- <u>Theft</u>: all other crimes against property
