Data Sources

The Demographic Section of this report comes from the US Census Bureau (www.census.gov). Most tables are derived either from the census estimates for 2015 or from the Community Population Survey aggregated over a several year period. The table header describes the specific years from which the data is derived. The tables present the number of persons and percentages which in almost all circumstances represent the category specific percentage of all persons referenced by the table (e.g., percentage of persons age 15 and older who are married). Age specific poverty rates represent the percentage of each age group in poverty (e.g., percentage of children under five years in poverty).

The **Vital Statistics** section of this report comes from the birth and death records collected by the North Dakota Department of Health Vital Records. This data is aggregated over a five year period. All births and deaths represent the county of residence not the county of occurrence. In order to maintain a person's confidentially, the number of events is blocked if fewer than six.

The **Adult Behavioral Risk Factor** section of this report is derived from the North Dakota Department of Health's Behavioral Risk Factor Surveillance Survey. The aggregated data (the number of years specified in the table) is continuously collected by telephone survey from persons 18 years and older residing in North Dakota. All data is self-reported data.

Data presented in the **Crime** section of this report is collected from the North Dakota Attorney General website located at: www.ag.nd.gov/Reports/BCIReports/CrimeHomicide/CrimeHomicide.htm.

Data presented in the **Child Health Indicators** section of this report is collected from the Kids Count Data Center website located at: www.datacenter.kidscount.org.

Vital Statistics Data

BIRTHS AND DEATHS DEFINITIONS

Formulas for calculating rates and ratios are as follows:

Birth Rate = Resident live births divided by the total resident population x 1000.

Pregnancies = Live births + Fetal deaths + Induced termination of pregnancy.

Pregnancy Rate = Total pregnancies divided by the total resident population x 1000.

Fertility Rate = Resident live births divided by female population (age 15-44) x 1000.

Teenage Birth Rate = Teenage births (age \leq 20) divided by female teen population x 1000.

Teenage Pregnancy Rate = Teenage pregnancies (age<20) divided by female teen population x 1000.

Out of Wedlock (OOW) Live Birth Ratio = Resident OOW live births divided by total resident live births x 1000.

Out of Wedlock Pregnancy Ratio = Resident OOW pregnancies divided by total pregnancies x 1000.

Low Weight Ratio = Low weight births (birth weight ≤ 2500 grams) divided by total resident live births x 1000.

Infant Death Ratio = Number of infant deaths divided by the total resident live births x 1000.

Childhood & Adolescent Deaths = Deaths to individuals 1 - 19 years of age.

Childhood and Adolescent Death Rate = Number of resident deaths (age 1 - 19) divided by population (age 1 - 19) \times 100,000.

Crude Death Rate = Death events divided by population x 100,000.

Age-Adjusted Death Rate = Death events with age specific adjustments x 100,000 population.

ADULT BEHAVIORAL RISK FACTORS DEFINITION

The following three pages represent data received from the Adult Behavioral Risk Factor Surveillance Survey. Numbers given are point estimate percentages followed by 95% confidence intervals. Statistical significance can be determined by comparing confidence intervals between two geographic areas. To be statistically significant, confidence may not overlap. For example the confidence intervals 9.3 (8.3-10.2) and 10.8 (10.0-11.6) overlap (see picture below) so the difference between the two numbers is not statistically significant. That means that substantial uncertainty remains whether the apparent difference is due to chance alone (due to sampling variation) rather than representing a true difference in the prevalence of the condition in the two populations. The less they overlap, the more likely it is that the point estimates represent truly different prevalence's in the two populations.

ADULT BEHAVIORAL RISK FACTORS, 2011-2015

Table 17

ALCOHOL	Sargent 2011-2015	North Dakota 2011-2015
Respondents who reported binge drinking (5 drinks for men, 4 drinks for women) one or more times in the past 30 days.	25.5 (18.3-32.8)	24.1 (23.3-24.9)
Respondents who reported heavy drinking (more than 2 drinks per day for men, more than 1 drink per day for women) during the past 30 days.	10.3 (5.2-15.3)	6.7 (6.3-7.2)
Respondents who reported driving when they had too much to drink one or more times during the past 30 days.	1.6 (0.0-4.0)	3.4 (2.8-3.9)
ARTHRITIS		
Respondents who reported being limited in any usual activities because of arthritis or joint symptoms.	51.5 (33.9-69.2)	47.0 (45.2-48.9)
Respondents who reported ever have been told by a doctor or other health professional that they had some form or arthritis.	30.2 (22.9-37.4)	24.6 (24.0-25.2)
ASTHMA		
Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma.	9.2 (4.4-14.0)	11.9 (11.3-12.4)
Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma and who still have asthma.	7.7 (3.1-12.2)	8.4 (7.9-8.9)
BODY WEIGHT		
Respondents with a body mass index greater than or equal to 25 but less than 30 (overweight).	36.7 (27.9-45.4)	36.5 (35.7-37.3)
Respondents with a body mass index greater than or equal to 30 (obese).	37.6 (29.2-46.1)	30.3 (29.6-31.1)
Respondents with a body mass index greater than or equal to 25 (overweight or obese).	74.3 (66.6-82.0)	66.8 (66.0-67.7)
CANCER		
Respondents who reported ever having been told by a doctor, nurse or other health professional that they had cancer (excluding skin cancer).	11.2 (6.4-15.9)	6.4 (6.1-6.7)
CARDIOVASCULAR		
Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a heart attack.	4.9 (2.2-7.7)	4.3 (4.0-4.5)
Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had angina.	2.2 (0.6-3.8)	4.0 (3.7-4.2)
Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke.	3.1 (1.2-5.0)	2.4 (2.2-2.6)
Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had any of the following: heart attack, angina or stroke.	7.3 (4.1-10.5)	7.5 (7.2-7.8)
	Respondents who reported binge drinking (5 drinks for men, 4 drinks for women) one or more times in the past 30 days. Respondents who reported heavy drinking (more than 2 drinks per day for men, more than 1 drink per day for women) during the past 30 days. Respondents who reported driving when they had too much to drink one or more times during the past 30 days. ARTHRITIS Respondents who reported being limited in any usual activities because of arthritis or joint symptoms. Respondents who reported ever have been told by a doctor or other health professional that they had some form or arthritis. ASTHMA Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma. Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma and who still have asthma. BODY WEIGHT Respondents with a body mass index greater than or equal to 25 but less than 30 (overweight). Respondents with a body mass index greater than or equal to 30 (obese). Respondents with a body mass index greater than or equal to 25 (overweight or obese). CANCER Respondents with a body mass index greater than or equal to 25 (overweight or obese). CANCER Respondents who reported ever having been told by a doctor, nurse or other health professional that they had cancer (excluding skin cancer). CARDIOVASCULAR Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a heart attack. Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke. Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke.	Respondents who reported binge drinking (5 drinks for men, 4 drinks for women) one or more times in the past 30 days. Respondents who reported heavy drinking (more than 2 drinks per day for men, more than 1 drink per day for women) during the past 30 days. Respondents who reported driving when they had too much to drink one or more times during the past 30 days. Respondents who reported being limited in any usual activities because of arthritis or joint symptoms. Respondents who reported ever have been told by a doctor or other health professional that they had asthma. Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma and who still have asthma. Respondents with a body mass index greater than or equal to 25 but less than 30 (overweight). Respondents with a body mass index greater than or equal to 25 (overweight or obese). CANCER Respondents who reported ever having been told by a doctor, nurse or other health professional that they had asthma and who still have asthma. CANCER Respondents with a body mass index greater than or equal to 25 (overweight or obese). CANCER Respondents with a body mass index greater than or equal to 25 (overweight or obese). CANCER Respondents who reported ever having been told by a doctor, nurse or other health professional that they had cancer (excluding skin cancer). CARDIOVASCULAR Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a heart attack. Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a heart attack. Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke. Respondents who reported ever having been told by a doctor, nurse or other health care professional that they had a stroke.

ADULT BEHAVIORAL RISK FACTORS, 2011-2015

Table 18

	CHOLESTEROL	Sargent 2011-2015	North Dakota 2011-2015
Never Cholesterol Test	Respondents who reported never having a cholesterol test.	15.1 (6.8-23.4)	22.8 (21.8-23.8)
No Cholesterol Test in Past 5 Years	Respondents who reported never having a cholesterol test in the past five years.	19.6 (10.9-28.4)	27.2 (26.2-28.3)
High Cholesterol	Respondents who reported that they had ever been told by a doctor, nurse or other health professional that they had high cholesterol.	43.5 (33.4-53.5)	36.1 (35.1-37.1)
	CHRONIC LUNG DISEASE		
COPD	Respondents who have ever been told by a doctor, nurse or other health professional ever told you that they have COPD (chronic obstructive pulmonary disease), emphysema, or chronic bronchitis.	5.7 (2.9-8.5)	4.7 (4.4-5.0)
	COLORECTAL CANCER		
No Colorectal Cancer Screening within Recommended Timeframe	Respondents age 50 and older who reported not having a fecal occult blood test in the past two years.	40.9 (22.1-59.7)	40.0 (38.3-41.7)
	DIABETES

CRIME

Data presented on the North Dakota Attorney General website changed from previous years. In an effort to continue to provide this data, the variables are defined as follows which differs slightly from the 2010-2013 data:

- Rape: includes statutory rape and forcible rape
- Assault: only includes aggravated assault
- <u>Larceny</u>: all other property crimes
