**Presenters**

Joan Connell, MD, Medical Officer, North Dakota Department of Health  
Michelle Feist, Epidemiologist, North Dakota Department of Health  
Dennis Lutz, MD, Professor and Chair, Department of Obstetrics and Gynecology, University of North Dakota School of Medicine and Health Sciences  
Noe Mateo, MD, Medical Officer, North Dakota Department of Health

**Learning Objectives**

1. Understand the general epidemiology of the Zika virus.
2. Identify general medical information to include signs, symptoms and treatment for the Zika virus.
3. Discuss the risks and preventative measures to be realized and taken by women of child bearing age.
4. Describe the care and testing of infants born to mothers with a history of Zika infection.

Continuing education credits are pending for physicians, nurses and laboratory personnel.

All BTWAN and Local Public Health facilities will be connected by video conference unless otherwise requested. Please reserve the room in your facility where the video conference equipment is located.

Participation by video is encouraged; however, if you cannot attend by video you may view the presentation online. The live webcast link is <http://www.ndhealth.gov/WebcastHigh.aspx>.

You may also participate via phone by dialing in toll-free at **866.888.3385**. No PIN is required. You will automatically be muted, and instructions for asking questions will be given when the question and answer portion of the meeting begins.

If you encounter a need for technical support with the video conference, teleconference, or webcast, please call **701.328.1332** for assistance.
