

CLASS C OPERATOR TRAINING CHECKLIST

North Dakota Health Department – Division of Waste Management

Underground Storage Tank Operator Training Program

Gold Seal Building - 918 E. Divide Ave., 3rd Floor

Phone: 701-328-5166 Fax: 701.328.5200 – Website: www.ndhealth.gov/wm

Revised 03/2012

Instructions: Below is a guideline that can be used to help Class C Operators at your facility fulfill their training requirements. At least one Class C Operator (or higher class) must be present onsite while the tank system is operating. If your facility is a service station and allows customer fueling via pay at the pump only (meaning the convenience store is closed, no employees present) you are required to post a sign with the name and address of the facility and the telephone number of the facility owner, operator, or local emergency response. Training records must be immediately available.

Facility Information

Facility Name:	
Facility Address:	

Check each area of training related to the Operator's specific duties upon completion:

- Fuel Pump Emergency Shut-offs: Location(s) and Usage
- Leak Detection Console: Warnings, Alarms, and Response
